

Fact sheet

Introduction

Developing software of the best quality

Our main goal is to **create stable and ergonomic IT systems**. XPro is a harmonious and already experienced **team** of young people not afraid of challenges. For those talented and skilled employees, we create conditions which would help them to develop and fulfill their professional ambitions.

We are focused on our clients' satisfaction. Our mission is to provide convenient solutions **that meet customers' expectations**. When developing software, we remember that its quality will be put to the test everyday for hundreds and thousands times. To ensure that it can do well **we acquire knowledge about newest technologies and implement it**. We communicate with our clients often to provide the software fitting their needs best. We provide the software and the code as well – everyone can verify the quality of our work.

We're developing. Carrying on the cooperation with clients, who have trusted us, we start new projects and prepare to enter other markets. Our employees are acquiring new skills, the company itself is growing. We're looking forward to work with new strategic partners. We're **taking part in contests and comparisons** for business entities to prove our value.

Best regards,
Michał Kłeczek, chairman of XPro
